

COMPANY PROFILE

Our mission

"Create the future food standard by facing up to people and society"

Our vision

Focusing on plant-based ingredients such as lemons, we will deliver "value beyond deliciousness" and become "a partner who can be close in your daily life".

The attractiveness of whole ingredients and surprise at their combination

Connect with the local community through food

Happy times to enjoy food with vitality

Through these food experiences, we hope to be a presence that helps people smile and gives them energy every day.

Our promises

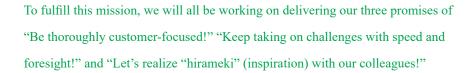

- 1. Be thoroughly customer-focused!
- 2. Keep taking on challenges with speed and foresight!
- 3. Let's realize "hirameki!" (inspiration) with our colleagues!

MESSAGE FROM THE PRESIDENT

Pokka Sapporo Food & Beverage was formed in 2013 through the merger of Pokka Corporation and Sapporo Beverage. Based on our role in the beverage businesses of the Sapporo Group, we value continuing to deliver "value beyond deliciousness" to customers by leveraging the origins and fortes of both companies.

Ever since launching our "Pokka Lemon" in 1957, we have remained taking on challenges of creating new value that meets contemporary requirements through beverage businesses and soup businesses with a focus on our lemon businesses. Our enduring mission going forward is to "Create the future food standard by facing up to people and society" drawing on the hope that the products and services we come up with will continue being an integral part of your daily life, just like "Pokka Lemon" that is so many households cherish today.

Pokka Sapporo is committed to delivering "value beyond deliciousness" focused on plant-based ingredients such as lemons, through H+ESG management that balances achieving both a sustainable society and corporate growth, and seeks to play key role related to the daily lifestyles of people to bring smiles and positivity as "a partner who can be close in your daily life."

I hope you will continue to support us.

POKKA SAPPORO FOOD & BEVERAGE LTD.
President and CEO

Contributing to the Well-being of Our Customers by Maximizing the Value of Lemon

Since our launch of Pokka Lemon in 1957, we have engaged in product development appropriate to the changing times, by promoting new uses for lemons and introducing variations in beverage container sizes, and we have continued to enjoy the support of our many customers for many years. In 2001, we launched Chelate Lemon, a beverage containing fruit juice equivalent to that of one lemon* and which allows customers to experience the value of lemons. Our launch of this product has created new products and product demands. Through these products and others, we will contribute to the well-being of our customers by expanding the overall demand for lemons by sharing information on the health benefits of lemons and proposing how and where lemons can be used.

* Contains fruit juice of one lemon, where the amount of fruit juice per lemon is approximately 30 ml.

Our Close Relationship with Lemons

Over many years, we have conducted research on the value of lemons, such as on their health benefits and culinary functions. In 2024, based on the results of clinical research trials, Pokka Lemon 100 became a food product labeled as "Reduces high blood pressure (systolic blood pressure)".

Going forward, we will continue to have a close relationship with lemons in order to bring the value of lemons to even more customers.

Sustainability activities

Supporting sustainable domestic lemon together with local communities

Planting lemon trees on abandoned land to pass down fertile land and lemons to future generations

In order for us to ascertain the current status of lemon cultivation at production centers, for the purpose of the revitalization of Japanese lemons, we started cultivating lemons in Osakikamijima-cho, Hiroshima Prefecture in 2019. We confront the issues involved in the primary industry and engage in the cultivation of lemons at our own farm.

Contributing to the health of local communities through the power of ingredients

Dietary education about lemons

In order for as many people as possible to experience the deliciousness and health benefits of lemons, we tackle education activities through lemons, by hosting extracurricular classes and events about lemons at elementary schools.

BEVERAGE

Developing Products Unique to Pokka Sapporo that Inspire Excitement and Surprise

At Pokka Sapporo, we utilize ideas and ingredients to develop unique, unprecedented products, and work hard to generate new demand in the beverage market. We provide our customers with the excitement of delicious taste while cherishing the nature of Pokka Sapporo, through products such as Kagabo Roasted Tea, made using domestic ingredients, as well as our long-selling brand, Pokka Coffee.

SOUP

Catering to Diversifying Dietary Needs

We first launched canned soup in 1980, and in 1981 we made a full-scale entry into the soup market with powdered instant soup. Since then, we have generated unique ideas and original flavors, to increase the number of Western-style soup variations and became the first company to add corn kernels to our soup. Moreover, we have sold a variety of soup products while conducting research into granulation technologies* and unique ingredients. With our main brand of Jikkuri Kotokoto, which is a rich and filling soup that makes the most of the natural flavors of its ingredients, we are providing products that meet the needs of diversifying dietary and customer needs.

^{*} This is a process for creating soup in which the powder dissolves smoothly when hot water is poured on it. The process involves creating gaps of air in the powder so that lumping does not occur, and then binding the grains together to create granules.

Sustainability - Creating a Sustainable Society-

At Pokka Sapporo, we aim to achieve a sustainable society and sustainable business growth at the same time. With our policy of "a delicious relationship between humans and plants", we achieve these goals through H+ESG management. ("H" means "Health", plus "ESG", which refers to "Environment", "Social", and "Governance".)

H+ESG

Contributing to the smiles and liveliness of people through daily dietary habits

We develop dietary education activities through our business to contribute to the daily liveliness and health of our customers. We also tackle health management for improving the health of our employees, with the aim to continue to receive the "KENKO Investment for Health WHITE 500" certification.

Environment

Initiatives aimed at preserving the environment

In order to achieve a decarbonized society, we will focus efforts on reducing CO2 emissions while expanding various activities, such as for creating containers for a recycling-based society, conducting activities for environmental conservations, and working to reduce waste materials and food loss.

S ocial

Contributing to solving issues of local societies

We are working to strengthen our relationships with local societies through various activities. For example, we confront the problems of local societies and engage in regional revitalization activities (such as revitalization of Japanese lemons) through our business activities, as well as social contribution activities (such as donations to local governments).

Governance

Corporate system for achieving stable trust

Product Quality Initiatives

In order to provide our customers with products and services that they can trust and which meet their needs, we have constructed a system for assessing and eliminating risks in the process of raw materials, product development, production, and distribution. Also, a fundamental approach for us is to sincerely listen to the voices and opinions of our customers and share them throughout the company so as to improve the quality of our products and services.

— Quality Policies —

We promise to provide our customers with products and services that they can trust and which meet their needs.

We cherish our dialogs with customers.

We give customers peace of mind through our knowledge and technologies.

We continue to create the quality of tomorrow.
